

Measurement Error in the Standardized Interview

Dieter Ohr

1. Measurement Error: Concept and Estimation

- 1.1. Definitions
- 1.2. Estimation

2. The Respondent as a Source of Measurement Error

- 2.1. Model of the Interview
 - 2.1.1. Respondent Errors Viewed from Cognitive Psychology
 - 2.1.2. Respondent Errors Viewed from Rational Choice Theory
- 2.2. Social Desirability
- 2.3. Response Sets (Acquiescence and Other Types)
- 2.4. Two Correlates of Respondent Error: Age and Education

3. The Interviewer as a Source of Measurement Error

- 3.1. The Role of the Interviewer
- 3.2. Designs for Measuring Interviewer Variance
- 3.3. Some Results on Interviewer Effects From the Literature
 - 3.3.1. Interviewer Variance: Estimates of Random Interviewer Error
 - 3.3.2. Systematic Interviewer Effects
- 3.4. Analyzing Interviewer Effects Within the Multi-Level Design
 - 3.4.1. The Traditional Linear Regression Model to Analyze Interviewer Effects
 - 3.4.2. Hierarchical Linear Models to Analyze Interviewer Effects
 - 3.4.3. Estimates for Interviewer Effects in a Telephone Survey on Religious Minorities

4. The Task as a Source of Measurement Error

- 4.1. The Kind of Information Being Sought
- 4.2. Problems and Decisions in Devising a Questionnaire
 - 4.2.1. The Non Attitude-Problem and Don't Know-Responses
 - 4.2.2. Omitting or Offering a Middle Category
 - 4.2.3. Statements vs. Forced Choice-Questions
 - 4.2.4. Particular Effects of Question Wording
 - 4.2.5. Context Effects (Order Effects)
- 4.3. Mode Effects: Comparing Face-to-Face and Telephone Interviews
